Leaders in Multi Drawer and Large Capacity Refrigerators

**NEW  
release**

New Zealand's bestselling Multi Drawer Range since 2004.

---

## The ultimate in freshness and style

Since 1954 the engineers at Mitsubishi Electric have become experts at developing reliable, design-orientated and functional refrigerators. Sixty three years later, we are pleased to introduce our latest range with a refrigerator to suit any kitchen and any lifestyle. Designed and engineered in the pursuit of excellence, our refrigerators have been developed with superior food storage in mind and have been tested with uncompromising precision.

When creating this range our engineers adopted a 'Form Follows Function' design philosophy. This has resulted in a range of feature driven refrigerators that are specifically designed to keep food fresh as nature intended.

This brochure covers our three key ranges - Multi Drawer, French Door, and our Classic Two Door Collection. With a range of unique colours, finishes and layouts to choose from, we are confident you will be able to find the perfect refrigerator for your space.

## Upright Freezer

---

## The freshest ingredients deserve the best of care

Mitsubishi Electric offers a range of sophisticated Multi Drawer Refrigerators designed specifically for those who care about preserving the quality and freshness of all kinds of food. Sleek aesthetics and advanced food storage technology will appeal to entertainers and food lovers alike.

---

### Multi Drawer, Multi Temperature Sensors, Customised Control

Multi Drawer Technology recognises that different types of food require different temperatures to optimise their freshness. Our Four Drawer models feature multiple temperature sensors that allow independent temperature control and monitoring of the main Refrigerator Compartment as well as each of the four drawers. Our Two Drawer models feature multiple temperature sensors and have an Automatic Temperature Control System ensuring different foods are stored at their ideal temperature.

---

### Ergonomic User Friendly Layout that Improves Energy Efficiency

Research into fridge usage has influenced the layout and design of Mitsubishi Electric Multi Drawer Refrigerators. The ergonomic layout reduces the amount of bending required as the most commonly used compartments are at waist height or above, while the convenient drawer style provides a top-down view into the Humidity and Freezer Compartments so food is visible and easily organised. This design ultimately improves energy efficiency by minimising the loss of cooled air.

---

### Advanced Inverter Technology with Neuro Fuzzy Logic

The use of super-efficient Inverter Technology combined with multiple monitored temperature sensors installed throughout these refrigerators makes our Multi Drawer Inverter Series one of the most energy efficient fridge ranges in New Zealand. These Large Capacity fridges are able to accurately control the temperature of each drawer to ensure excellent customisation and minimal temperature fluctuations. By utilising Neuro Fuzzy Logic, they learn from and adapt to your lifestyle, optimising output for unparalleled energy efficiency.

---

### Award Winning Energy Efficiency

The use of Inverter Technology with Neuro Fuzzy Logic means we range some of the most efficient and quietest refrigerators available in New Zealand. In fact, 21 of our refrigerators feature the coveted Energy Star® Mark meaning they are some of the most energy efficient fridges available in New Zealand. An Energy Star® qualified refrigerator uses up to 40% less energy compared to a non-qualified model, resulting in cheaper annual running costs and a smaller energy footprint.

---

### Unrivalled for Quietness

Our engineers understand that with the trend of open plan living becoming more prevalent, the kitchen has truly become the heart of the home. So when it comes to kitchen design and appliance choice, quiet operation is becoming more and more important. Starting from an incredible 15dBA (WX/EX), our Inverter Multi Drawer Range features some of New Zealand's quietest fridges available in their class.

## WX 627L & 743L Glass Panel Four Drawer Inverter Range

Rich  
Mahogany

White  
Diamond

With its stunning Glass Flat Panel Slimline Design, Touch Panel Controls and Advanced Efficiency, the WX Multi Drawer Series sets a new standard in refrigeration. Its five separate temperature controlled zones maximise energy efficiency and ensures all kinds of food stay fresher for longer.

### MR-WX627Z\*

627 Litres

### MR-WX743Y

800W x 748D x 1821H mm

743 Litres

\*MR-WX627Z available at selected retailers only.

Both WX627Z and WX743Y available in Rich Mahogany and White Diamond.

### Advanced Inverter Technology with Neuro Fuzzy Logic

The use of super-efficient Inverter Technology combined with eight (WX743) monitored temperature sensors installed throughout the refrigerator makes the WX Series one of the most efficient in New Zealand. The WX is able to accurately control the temperature of each drawer to ensure excellent customisation and minimal temperature fluctuations. With Neuro Fuzzy Logic Technology, the WX learns from and adapts to your lifestyle, optimising output for unparalleled energy efficiency.

**NEURO  
INVERTER**

### Award Winning Energy Efficiency

The WX has been awarded the Energy Star® Mark with its 3.5 star energy rating. Energy Star® qualified refrigerators use up to 40% less energy compared to non-qualified models.

### Whisper Quiet - Ideal for Open Plan Living

The WX Series truly is whisper quiet, rated at only 15dBA. In fact, no other refrigerator in its class is quieter.

Quietest  
in its Class!

### WX Key Features

Neuro Fuzzy Logic Inverter Technology

Whisper Quiet

Multi Temperature Zone Control

Vitalight Humidity Drawer

Non-Plumbed Automatic Ice Maker

Versa Freezer Drawer

Freezer Drawer

Touch Panel LED Control

Forced Air Convection Airflow

Super Bright Interior LED Lights

Double Sliding Chilled Case

Glass Shelves

Soft Closing Doors

Removable Internal Drawer Bins

Door and Drawer Alarm

## Our Unique Slimline Design Maximises Internal Space

The WX Series features its most advanced insulation yet; specifically designed to maximise food storage while maintaining a slim, sleek external profile. The 'Vacuum Insulation Panels', or 'VIP' is thinner and 10x more efficient than conventional insulation. The result is a larger internal capacity for maximum food storage space while maintaining smaller external dimensions for a slimmer, more compact design. At a convenient 685mm wide, the WX627 is able to easily slot into an existing 700mm cavity while providing ample internal space.

### 1 Multipurpose Double Sliding Chilled Case

With a set temperature range between 0°C to 3°C, the top case is ideal for storing deli items such as meats, cheeses and dips. In Supercool Chilling Mode, the bottom case is perfect for storing fresh meats and fish for up to 7 days without freezing. This also serves as additional chilling space for beverages.

### 2 Non-Plumbed Automatic Ice Maker

The WX Series features the Non-Plumbed Automatic Ice Maker to ensure you always have fresh, clean ice. As there is no separate plumbing connection required, this cost effective approach to ice making means the fridge can be placed anywhere in the kitchen, not just near existing pipe work. Simply fill the removable water tank and the Ice Maker is ready to go!

### 3 Multifunctional Versa Freezer Drawer

The Versa Freezer Drawer preserves food quality while maintaining texture and taste; making storage more convenient and preparation a breeze. It offers advanced freezing options such as Soft Freezing, Hot Freezing and Supercool Freezing for ultimate convenience and versatility.

#### Soft Freezing

Scoop

Divide

### 4 Freezer Drawer

A convenient sliding top tray is ideal for large flat pack or frequently accessed items, and is easily pushed back to reveal the large bin for bulky items. The useful top-down view ensures that your food is easy to organise. The bin can also be completely removed for easy cleaning.

### 5 Vitalight Humidity Drawer

In New Zealand we are lucky to have some of the freshest fruit and vegetables in the world. To keep food fresh as nature intended, the WX Series has a specially designed Humidity Drawer with advanced Vitalight Technology. An amber LED light installed in the drawer recreates sunlight to maintain vitamin levels for longer. The result? Produce stays fresher for longer.

### 4 Freezer Drawer

A convenient sliding top tray is ideal for large flat pack or frequently accessed items, and is easily pushed back to reveal the large bin for bulky items. The useful top-down view ensures that your food is easy to organise. The bin can be completely removed for easy cleaning.

### 5 Humidity Drawer

In New Zealand we are lucky to have some of the freshest fruit and vegetables in the world. To keep food fresh as nature intended, the EX Series has a Humidity Drawer with Vitalight Technology (Vitalight in EX655 only). An amber LED light installed in the drawer recreates sunlight to maintain vitamin levels for longer. The result? Produce stays fresher for longer.

Vitalight System

Conventional Model

1 week of storage

## Non-Plumbed Automatic Ice Maker

Our Non-Plumbed Automatic Ice Maker ensures you'll always have fresh, clean ice. As there is no separate plumbing connection required, this cost effective approach to ice making means the fridge can be placed anywhere in the kitchen, not just near existing pipe work. Simply fill the removable water tank and the Ice Maker is ready to go!

### Removable Water Tank

The water tank located at the base of the Refrigeration Compartment saves significantly more space than in-door ice makers which compromise on available depth. The water tank is easily removed, cleaned and refilled at the kitchen sink without the hassle and additional cost of plumbing the refrigerator into the water supply.

EX Model

### Easy Clean System

The entire water supply system is easy to clean; removable water tank components just need to be flushed periodically with water to maintain optimum performance and prevent the build up of grime.

### Water Purification

Most automatic ice makers require filters to be replaced every 3-6 months which can be a costly and difficult exercise. With our Non-Plumbed Automatic Ice Maker however, water in the refrigerator tank is purified through a filter which removes impurities to ensure fresh, clean ice for up to 10 years without needing to replace the filter.

### The Ice Drawer

The separate Ice Drawer in the WX/EX models ensures ice cubes remain odour free, preventing absorption of lingering food odours that may be present.

## Freezer Drawer

The Freezer Drawer is divided by a Sliding Tray at the top that can be pushed back to reveal the rest of the Freezer Drawer. The Freezer Drawer is roomy enough to fit bulky items such as ice cream tubs, loaves of bread and frozen vegetables. The top tray is ideal for storage and organisation of flat pack items such as meat packs. The bin can also be completely removed for easy cleaning.

## Humidity Drawer

The Humidity Drawer is designed to maximise the freshness of produce. The drawer provides the ideal storage environment for fruit and vegetables by maintaining higher humidity than the main Refrigerator Compartment, so fruit and vegetables stay crisper and fresher for longer.

*Vitalight System*

*Conventional Model*

1 week of storage

EX Model

### Customisable Temperature Control

Providing true versatility, the temperature of the Humidity Drawer (EX/WX) can be customised from around 3°C to 9°C. As different foods require different temperatures to stay fresher for longer, this drawer can be adjusted to truly suit the foods you like to eat.

### Sliding Top Tray

The Humidity Drawer is divided by a Sliding Tray at the top that can be pushed back to reveal the rest of the drawer. The top tray is ideal for storage and organisation of smaller, easily damaged items such as spinach.

### Vitalight LED System (EX655/WX Series)

The unique Vitalight LED Lighting System is designed to slow down the wilting process of leafy greens, maintaining their original vitamin and anti-oxidant levels for longer. Vegetables and fruit stored in the specially designed Humidity Drawer with its integrated Vitalight LED System will last significantly longer in comparison to conventional vegetable crisper bins.

### Maintain Moisture Function

Perfect for leafy vegetables, this function lowers the cooling airflow of the Humidity Drawer to reduce dryness and maintain the moisture levels of your produce, keeping it fresher for longer.

## Supercool Chilling Case

The Supercool Chilling Case, exclusive to our WX Range, is ideal for storing fresh cuts of meat and fish for up to 7 days without freezing. The standard set temperature is between 0°C to 3°C however, the drawer can also drop to between -3°C to 0°C in Supercool Chilling Mode. The Supercool Chilling Case also conveniently serves as an additional storage space for canned and bottled beverages.

WX

# Versa Freezer Drawer

The Versa Freezer Drawer preserves food quality while maintaining original moisture and taste for longer; making storage more convenient and preparation a breeze. The Versa Freezer Drawer has three main modes: Hot Freezing, Soft Freezing and Supercool Freezing. When additional storage capacity is required, the Versa Freezer Drawer can also be utilised for standard freezing.

## Customisable Temperature Control

The Versa Freezer Drawer is truly versatile with the ability to adjust the temperature to suit the foods you like to eat and preserve. In Soft Freeze Mode the temperature can be adjusted between -5°C and -9°C. In Standard Freeze Mode the temperature range can be adjusted between -12°C and -18°C.

## Hot Freezing

Hot food (up to 80°C) can now be placed straight into the freezer due to an advanced LED Sensor which automatically detects hot food and adjusts the cold air flow directly towards it. Hot food is cooled quickly via a separate air outlet for added convenience, time saving and to preserve the quality and freshness of the food.

## Soft Freezing

Soft Freezing allows food to be frozen for up to three weeks in a semi frozen state. This means food can be easily cut without thawing, sauces can be stored frozen but kept soft enough to scoop out portions, and is also ideal for left over dips and baby foods.

Cut

Scoop

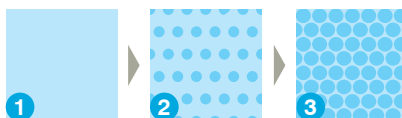

Divide

### Soft Freezing is great for:

- Easy portioning of meat and fish cuts.
- Raw meat such as beef for carpaccio.
- Soft frozen desserts, sorbets and smoothies.
- Sauces, dips and baby food.
- Frozen foods to be used within two to three weeks.

Supercool Freezing

Conventional Freezing

## Supercool Freezing

Specifically designed to maximise taste and maintain food texture and quality, Supercool Freezing ensures food is frozen evenly, locking in moisture and minimising cell destruction.

### Supercool Freezing Process:

- 1 The temperature drops below freezing point without freezing the food.
- 2 With a quick blast of cool air, ice particles form instantly ensuring food is frozen evenly.
- 3 Minute ice crystals develop evenly, locking in freshness, taste and texture.

### Conventional Freezing Process:

- 1 When the freezing point is reached food slowly freezes from the outside in.
- 2 Moisture in the food forces large needle-like crystals to form.
- 3 Taste and texture is affected as needle-like crystals destroy the food structure.

Once the supercool process is complete the Versa Drawer will default to Soft Freezing Mode. For long term storage, the food can be moved to the standard Freezer Drawer.

| Non-Plumbed Automatic Ice Maker | Multi Purpose Door Pockets        | Frost Free                       |
| Removable Drawer Bins           |                                   |                                  |

---

### 1 Multipurpose Sliding Chilled Case

With a set temperature range around 0°C, the Multipurpose Sliding Chilled Case is ideal for storing deli items such as meats, cheeses and dips. This case is perfect for storing fresh meats and fish for up to 7 days without freezing and serves as additional chilling space for beverages.

---

### 2 Three-Way Flexi Shelf

The Three-Way Flexi Shelf enables you to maximise your storage options by creating additional space when you need it without having to remove a shelf. Slide the shelf halfway back to store taller items in front or fold right back to create one large space ideal for storing bulky groceries.

---

### 3 Humidity Drawer

The Humidity Drawer is designed to maximise the freshness of produce. The drawer features a higher humidity than the main Refrigerator Compartment and is ideal for storing and keeping fruit and vegetables crisper and fresher for longer. The Humidity Drawer also features a tray at the top for storage and organisation of smaller items such as fruit.

---

### 4 Non-Plumbed Automatic Ice Maker

The G Series features the Non-Plumbed Automatic Ice Maker to ensure you always have fresh, clean ice. As there is no separate plumbing connection required, this cost effective approach to ice making means the fridge can be placed anywhere in the kitchen, not just near existing pipe work. Simply fill the removable water tank and the Ice Maker is ready to go!

---

### 5 Freezer Drawer

The Freezer Drawer is divided by a sliding tray at the top that can be pushed back to reveal the rest of the drawer. The Freezer Drawer is roomy enough to fit bulky items such as ice cream tubs, loaves of bread and frozen vegetables. The top tray is ideal for storage and organisation of flat pack items such as meat packs. The bin can also be completely removed for easy cleaning.

Designed for Larger Living

**NEURO  
INVERTER**

\* Image is of MR-L710EG-ST. Fridge layout differs slightly for MR-L650EH - see page 28 for full specs.

## Key Features

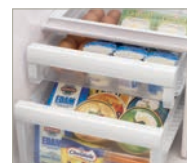

### 1 Capsule Case

For convenient and secure storage of smaller items.

### 7 Sliding Utility Cases

The utility case is perfect for separating dairy products, fresh fish or meat and chilling drinks.

### 2 Adjustable Pockets

Storage is simple with adjustable door pockets, which can change in height to suit the item you're storing.

### 8 Large Bottle Pockets

The L4 Range features large bottle pockets for convenient storage of drinks and condiments.

### 3 Tempered Glass Shelves

Heat resistant, easy to clean and adjustable to allow for customisation, these shelves are built to withstand up to 100 kilograms of weight.

### 9 Three Revolving Ice Trays

Three revolving trays release ice cubes into the ice box with a simple twist.

### 4 LED Lighting

The energy efficient LED lighting will illuminate your refrigerator up to 50 times longer than an average refrigerator light bulb.

### 10 Sliding Freezer Cases

The L4 Grande features a large, medium and two smaller storage compartments for frozen foods. This ensures you have an easy to use, well organised freezer.

### 5 Sliding Humidity Case

Adjustable Humidity Control allows customisation of the compartment to create the ideal environment for fruit and vegetables ensuring longer lasting freshness.

### 11 Ergonomic Design

Stylish aluminium handles provide space for a comfortable grip.

### 6 Vitalight

The unique LED lighting system is designed to slow down the wilting process and maintain vitamin and anti-oxidant levels for longer.

### 12 Twin Fan Multi Airflow

Twin ventilator fans blow and circulate air at various levels throughout the refrigerator and freezer compartments. This allows for even cooling distribution and keeps food fresher for longer.

## 290L, 325L & 390L Single Drawer Bottom Mount Range

White

Stainless Steel

Designed around frequency of use, this range features the Refrigerator Compartment on top and a generously sized Freezer Drawer at the bottom.

### Bottom Freezer Drawer - Convenient and Energy Efficient

The Freezer Drawer features a top tray that slides back to reveal more storage and ultimately improves energy efficiency by minimising the amount of time spent with the drawer open.

### Adjustable Glass Shelves

The Tempered Glass Shelves are built to withstand up to 100kg of weight. This range also features a Two-Way Glass Flexi Shelf which enables you to maximise your storage options. Remove the front half of the self to store taller items or remove the shelf completely to create one large space.

### Anti-Bacterial Food Liners

Anti-Bacterial Food Liners and a Minus Ion create a hygienic environment for your food.

## Key Features

Three Way Cooling

Freezer Drawer

Fruit and Vegetable Crisper

Two-Way Glass Flexi Shelf

Adjustable Tempered Glass Shelves

Multi Purpose Door Pockets

Large Bottle Pocket

Revolving Ice Tray

Frost Free

Door Alarm

Minus Ion Deodoriser

## 385L & 420L Top Mount Range

Stainless  
Steel

White

Our Classic Refrigeration Range will suit any home, large or small. Combining functionality with style, innovative surround cooling is coupled with a choice of a White or Stainless Steel finish; an ideal addition to any kitchen.

### MR-385E

686W x 709D x 1589H mm

385 Litres

Left Hand Available

### MR-420E

686W x 709D x 1694H mm

420 Litres

---

### Surround Cooling System

Mitsubishi Electric's innovative Surround Cooling System distributes a constant stream of chilled air to each shelf ensuring every corner of the refrigerator is cooled evenly. All areas inside the refrigerator, even the fridge door pockets, quickly regain optimum cooling temperatures after opening.

---

### Tempered Glass Shelves

The Tempered Glass Shelves are built to withstand up to 100 kilograms of weight.

---

### Anti-Bacterial Food Liners

Anti-Bacterial Food Liners and a Deodoriser Filter create a hygienic environment for your food.

## Key Features

Revolving Ice Tray

# 160L Upright Frost Free Freezer

White

Our top selling Frost Free Upright Freezer features 5 internal transparent drawers providing a generous 160 Litres of organised convenience! It is the perfect solution for those looking for dedicated freezer space.

## MF-U160C

480W x 586D x 1291H mm

160 Litres

### Energy Efficient Design

- The External Temperature Control Panel allows adjustments to be made easily without losing cool air.
- The Transparent Drawers keep the freezer at the optimum temperature by minimising the loss of cool air.
- The Aluminium Tray speeds up freezing time, and is especially effective for quickly freezing large bulky items when using Rapid Freeze Mode.

### Frost Free Freezer

Say goodbye to manually defrosting your freezer. The Mitsubishi Electric Frost Free Freezer automatically prevents ice build up.

### Rapid Freeze Mode

To freeze items quickly, simply press the “Rapid Freeze” button to activate the special fast-freeze cycle, locking in freshness.

### Key Features

Fan Cooling System  
Frost Free  
External Temperature Control

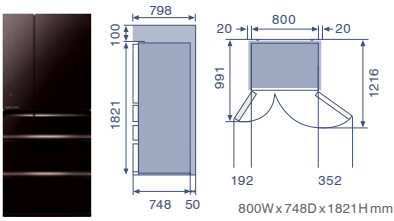

5 Internal Freezer Drawers

# This is New Zealand's bestselling Multi Drawer Range since 2004.

MR-CX370

MR-EX655

MR-WX627

In 2004, Mitsubishi Electric revolutionised the way New Zealanders kept their food fresher for longer by introducing a range of multi drawer fridges featuring an ergonomic drawer layout, with a dedicated Humidity Drawer and a Non-Plumbed Automatic Ice Maker.

This year we are proud to add the new CX Designer Series to the line-up of New Zealand's bestselling Multi Drawer

Refrigeration Range. Featuring Advanced Inverter Technology that not only delivers a 30% power saving\*, it makes the CX Series the quietest fridge in its class! And with a range of colours to choose from including Onyx Black, Red, White and Stainless Steel, you can be sure there is a fridge to match your kitchen design.
