

Connoisseur

Two Drawer Range

Multi Drawer technology recognises that different types of food require different temperatures to optimise their freshness. The Two Drawer models have an Automatic Temperature Control System ensuring different foods are stored at their ideal temperature. Multi drawer, multi temperature customisation means your food will stay fresher for longer.

Humidity Drawer

The Humidity Drawer is designed to maximise the freshness of produce. The drawer features higher humidity levels than the main refrigerator compartment and is ideal for keeping fruit and vegetables fresher for longer. The Humidity Drawer also features a tray at the top – ideal for storage and organisation of smaller items such as fruit.

Freezer Drawer

The Freezer Drawer is divided by a Sliding Tray at the top that can be pushed back to reveal the rest of the freezer drawer. The Freezer Drawer is roomy enough to fit bulky items such as ice cream tubs, loaves of bread and frozen vegetables. The top tray is ideal for storage and organisation of flat pack items such as meat packs.

Non-Plumbed Automatic Ice Maker

The water tank, located in the bottom of the Refrigeration Compartment, saves significantly more space in comparison to side-by-side refrigerators, which typically have ice makers integrated in the door design and compromise on available depth.

The water tank is easily removed, cleaned and refilled at the kitchen sink without the hassle and additional cost of plumbing the refrigerator into the water supply. This allows bottled mineral water to be used also.

Easy Clean System

The water supply system is easy to clean; removable water tank components just need to be flushed periodically with water to maintain optimum performance. Rubber components are treated with an anti-bacterial coating.

Model range

Available in Onyx Black, Red, White or Stainless Steel*.

MR-C375G
600W x 666D x 1678H mm

MR-C405G
600W x 666D x 1798H mm

All Features: MR-C375G & MR-C405G

Multi Airflow	Deodoriser with Minus Ion	Super Quiet Operation	Multi Purpose Door Pockets	Three-Way Flexi Shelf
Adjustable Tempered Glass Shelves	Multi Purpose Egg Shelf with 1 Egg Rack	Sliding Chilled Case	LED Lighting	Removable Vegetable Case
Top Tray (Humidity Drawer)	Frost Free	Sliding Top Tray (Freezer Drawer)	Auto Ice Maker	4 Castors
2 Adjustable Feet	Door Alarm			

* Left Hand Available in White & Stainless only. MR-C405G Onyx Black and Red available at selected retailers only.

Innovative Multi Drawer Technology

Multi Drawer technology recognises that different types of food require different temperatures to optimise their freshness. The Two Drawer models have an Automatic Temperature Control System ensuring different foods are stored at their ideal temperature. Multi drawer, multi temperature customisation means your food will stay fresher for longer.

Ergonomic User Friendly Layout

Designed with frequency of use taken into consideration, the refrigerator is located at the top, the fruit and vegetable Humidity Drawer is in the middle and the Freezer Drawer is at the bottom. This design minimises the amount of bending required when accessing the refrigerator.

Tempered Glass Shelves

Built to withstand up to 100 kilograms of weight, practical, easy to clean and adjustable to allow customisation.

Three-Way Flexi Shelf

Creates additional room without having to remove a shelf. Slide the shelf halfway back for taller items in front or fold right back to create one large space.

Multi Airflow Cooling System

Cold air is distributed from the back, both sides and front; cooling each compartment quickly and uniformly. Even door pockets are quickly cooled, with air circulating through the gaps in the bottom of each door pocket.

Sliding Chilled Case

Perfect for dairy products, fresh fish or meat and chilling drinks. Food is stored at around 0°C ensuring longer lasting freshness.

The ultimate in freshness and style

Since 1954 the engineers at Mitsubishi Electric have become experts at developing reliable, design-orientated, and functional refrigerators. Sixty one years later we are pleased to introduce our latest range, with a refrigerator to suit any home and any lifestyle. Designed and engineered in the pursuit of excellence, our refrigerators have been developed with superior food storage in mind and have been tested with uncompromising precision.

When creating this range our engineers adopted a 'Form Follows Function' design philosophy. This has resulted in a range of feature driven refrigerators that are specifically designed to keep food fresh as nature intended. Our refrigerators were also developed with an understanding that with open plan living the kitchen has truly become the heart of the home. It is no longer a purely functional space, but an expression of design and personality. This is why we are proud to introduce a range with unique colours, finishes, and designs to match any kitchen.
