Get Started Using Wi-Fi Control Energy Monitoring

A quick-start guide to your Wi-Fi Control App

Existing App Users

If your Wi-Fi Heat Pump Control is already configured and working with your compatible Mitsubishi Electric Heat Pump*, you can start using Wi-Fi Control Energy Monitoring immediately.
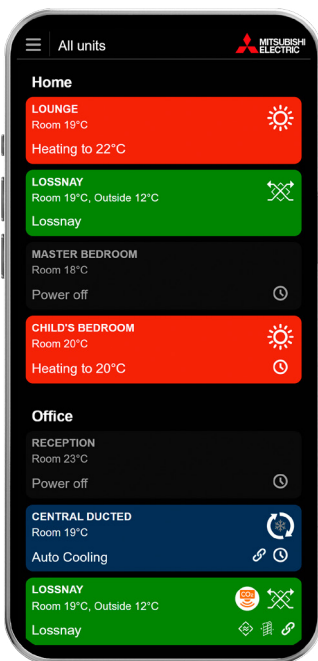

New App Users

If you haven't set up Wi-Fi Heat Pump Control yet, download the app from the Apple Store or Google Play Store. Follow the setup guide found under [Support] > [How to Setup] to add your Mitsubishi Electric Heat Pump to Wi-Fi Control.

Is Your Heat Pump Energy Monitoring Compatible?

*Our single room high wall heat pumps including the; Standard GS Series, EcoCore AP Classic Series and AS90 with Optional Wi-Fi Control, and EcoCore AP Plus Series, Designer EF Series, and Black Diamond LN Series with Built-in Wi-Fi Control are all Wi-Fi Energy Monitoring compatible. See page 3 for more information.
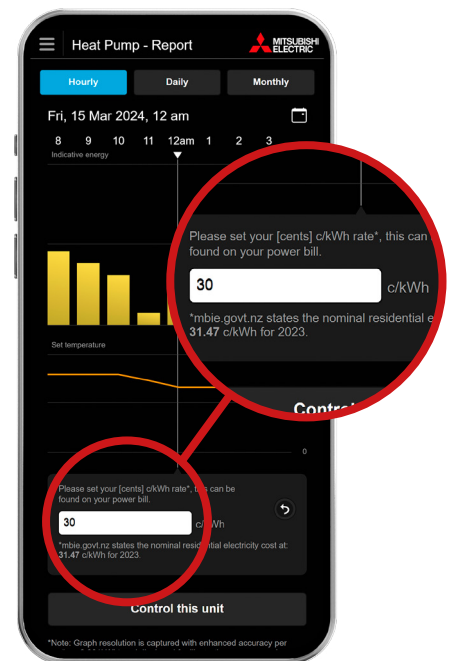

Start In-App Energy Monitoring

1) Select the heat pump you would like to monitor the energy usage of.

2) If your heat pump is compatible you will see [Energy Monitoring] underneath the airflow direction.

3) Set your cents per kWh (c/kWh) rate which you can find on your power bill. In this example, we have used the national average.
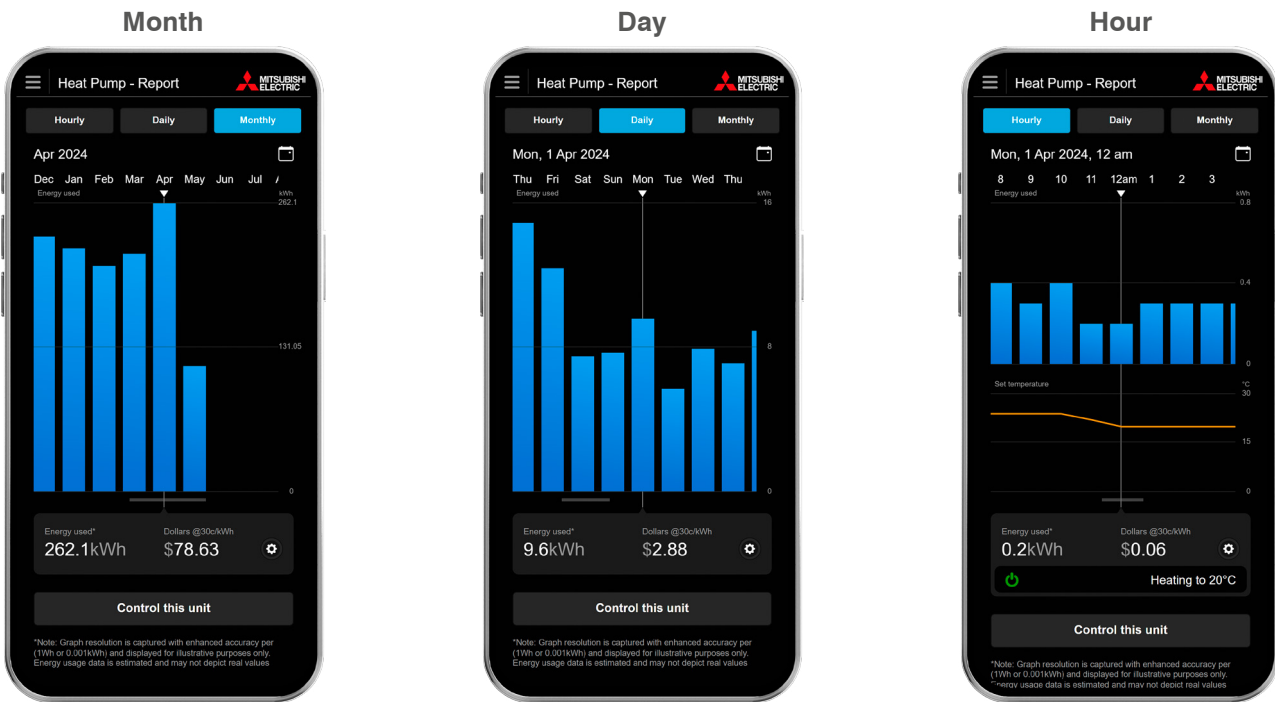

Indicative Energy View

Your Mitsubishi Electric Wi-Fi Energy Monitoring Compatible Heat Pump will display an 'Indicative Energy' view as standard. View your estimated heat pump energy consumption (kW) and cost ($) by...

Energy Monitoring Not Displaying?

1) Check Your Heat Pump Model is Wi-Fi Energy Monitoring Compatible

Compatible Heat Pumps with Optional Wi-Fi Control:

- Standard GS Series
  MSZ-GS25/35/42/50/60/VFD

- EcoCore AP Mini
  MSZ-AP20VGD

- EcoCore AP Classic Series
  MSZ-AP25/35/42/50/60/71/80VGD(2)
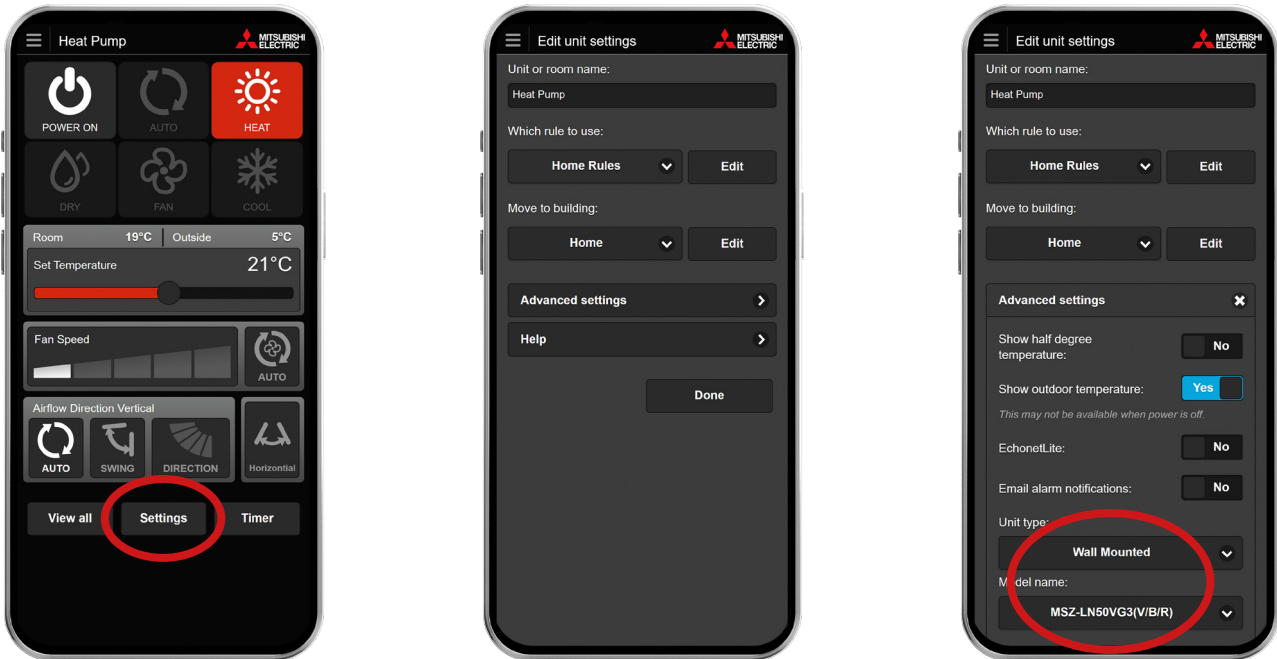

- Large Capacity AS90
  MSZ-AS90VGD

Compatible Heat Pumps with Built-In Wi-Fi Control:

- EcoCore AP Plus Series
  MSZ-AP25/35/42/50/60/71/80VGKD(2)

- Designer EF Series
  MSZ-EF25/35/42/50VGK(D)(B/S/W)

- Black Diamond LN Series
  MSZ-LN25/35/50/60VG(2/3)(R/V/B)

Wi-Fi Energy Monitoring is currently not compatible with RapidHeat KW Floor Consoles, P-Series and OmniCore Multi Room Systems.

2) Ensure the Correct Heat Pump Model is Selected in the Unit Settings

To check, visit the control screen of the heat pump unit > Settings > Advanced settings

Note: If you change the selected model you will reset your Energy Monitoring history.

3) Run Your Heat Pump in Heating or Cooling Mode Until Data Shows

New models must run in heating or cooling mode multiple times, with 3-hour off periods between operations, over several hours. This process helps determine the available type of Energy Monitoring.
