FOR OUTDOOR INSTALLATION
FROM 441 TO 1162 KW**

r R513A

FOCS-N-G05

THE GREEN, LARGE CAPACITY HEAT PUMP SOLUTION

Air source reversible heat pump with screw compressors, 441 – 1162 kW

FOCS-N-G05 is the ultimate solution for every plant which requires a reversible, large capacity air source heat pump. Featuring the green low-GWP R513A refrigerant, FOCS-N-G05 boosts the eco-friendliness of the heat pump technology offering a greener approach.

Designed for two-pipes systems, these units are able to produce hot or cold water according to the selected operation mode; ensuring optimal responses to every load's changes, in every operating conditions.

COMFORT APPLICATIONS

- ✓ Commercial premises
- ✓ Office buildings
- ✓ Hotels and resorts
- ✓ Healthcare facilities
- ✓ Retail and department stores
- ✓ Sports and leisure installations

TAILORED EFFICIENCY

B version

Designed for installation even in plants with space constraints, still maintaining the unparalleled advantages of the heat pump technology.

EER= 2,8
COP= 3,2

SEER= 4,1
SCOP= 3,2

CA version

High efficiency versions, thanks to oversized heat exchangers, giving an optimal compromise between footprint and efficiency and ensuring a fast payback.

EER= 2,9
COP= 3,3

SEER= 4,2
SCOP= 3,4

ACOUSTIC VERSIONS

	Standard	Unit with standard soundproofing equipment.	Baseline
LN	Low noise	Unit with compressor's acoustical enclosure and reduced fan speed.	-6 dB (A)
SL	Super low noise	The highest level of noise reduction which cuts noise emissions by 10 thanks to a special acoustical lining and reduced fan speed.	-10 dB (A)

HEAT RECOVERY CONFIGURATIONS

	Standard units	Unit for the production of chilled water.	Baseline
D	Partial heat recovery	A desuperheater on the compressor discharge line recovers approximately 20% of the unit's capacity.	60° C

ALL-ROUND SUSTAINABILITY

r

R513A

FOCS-N-G05 is the result of Mitsubishi Electric Hydronics & IT Cooling Systems' extensive approach to sustainability.

Increasing concerns about the global warming impact of chillers and heat pumps is driving new regulatory policies to push towards even more efficient units with the lowest carbon footprint.

Today, an all-round approach is the only way to effectively reduce the Total Equivalent Warming Impact (TEWI).

Fully committed to support the creation of a greener tomorrow, Mitsubishi Electric Hydronics & IT Cooling Systems designed FOCS-N-G05, a complete large capacity heat pump range with reduced environmental impact, optimized for R513A refrigerant.

Combining brilliant annual efficiency with the use of a low GWP refrigerant, FOCS-N-G05 tackles both the indirect (due to primary energy consumption) and the direct global warming, thus resulting in the perfect choice for any new, forward-looking cooling system.

LOW GWP
-56% GWP Vs R134a

Non-flammable
Safety Class A1

REFRIGERANT BENCHMARK

SCROLL		
Refrigerant	GWP*	Flammability
R410A	2088	NON flammable
R32	675	MILDLY flammable
R454B	466	MILDLY flammable
R452B	698	MILDLY flammable

*IPCC AR4 **ASHRAE 34 - ISO 817

SCREW		
Refrigerant	GWP*	Flammability
R134a	1430	NON flammable
R513A	631	NON flammable
1234ze	7	MILDLY flammable
1234yf	4	MILDLY flammable

New regulations like the EU F-gas and the Kigali Amendment to the Montreal Protocol, are driving the industry towards new eco-friendly refrigerants, with reduced greenhouse effect.

Unfortunately, the majority of low GWP refrigerants raises another critical issue: flammability.

The new refrigerant R513A, chosen for FOCS-N-G05, is a brilliant exception: it offers a -56% GWP reduction compared to the R134a's while ensuring complete non-toxicity and non-flammability (Class A1 of ASHRAE 34, ISO 817).

PERFECT INDOOR COMFORT

The advanced control system is engineered to maintain optimal comfort conditions all year-round according occupancy needs and variations.

3 different acoustic versions have been specifically developed for those projects, where quality of acoustical comfort is key.

COMPACT DESIGN FOR THE HIGHEST FLEXIBILITY

The compact structure resulting from the rationalised design and assembly of the heat pump components leads to more flexibility during the installation phase, both in case of new plants and existing ones.

EXTENSIVE OPERATING RANGE

The advanced control logics and fan speed regulation allow the units to be operative all year round. In heat pump mode the units are able to produce hot water up to 60°C, and to work with air temperatures down to -10°C during winter and up to +50°C during summer.

TECHNOLOGICAL CHOICES

Variable speed fans

- ▶ **Sizes 2022 to 2622:** high performing axial fans equipped with autotransformer for speed adjustment
- ▶ **Sizes 2722 to 4822:** high performing EC fans, for higher efficiency and continuous speed modulation

Shell-and-tube plant-side heat exchanger

Dry expansion shell-and-tube heat exchanger fully developed by Mitsubishi Electric Hydronics & IT Cooling Systems.

- ▶ Internally grooved copper tubes for enhanced heat exchange
- ▶ Low pressure drops
- ▶ Fully protected against ice formation

Electronic expansion valve

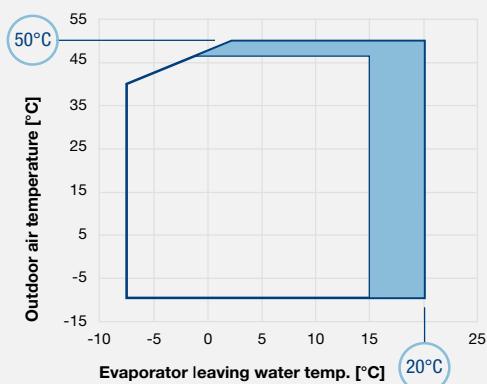

managed by proprietary dedicated logics, to guarantee an excellent flow control and a highly precise temperature control.

EXTENDED OPERATING LIMITS

FOCS-N-G05 can operate with outdoor air temperatures up to 50° C in cooling mode and down to -10°C in heating mode.

In heat pump mode, the units can supply hot water up to 60° C, thanks to the HWT kit (opt.1953)

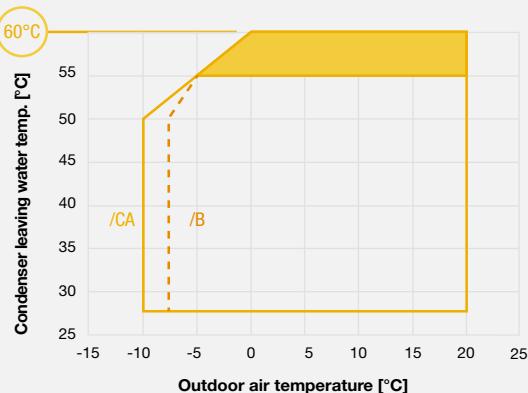

COOLING MODE OPERATING LIMITS

Standard unit

Required: HWT kit (Opt.1953)

HEATING MODE OPERATING LIMITS

EC fans: Maximum outside air temperature: 46°
In case of higher outdoor air temperature, dedicated EC fans must be selected

Advanced technologies smartly combined with the green R513A refrigerant: the perfect match for offering the highest efficiency levels.

Factory-mounted pump group (opt.)

- ▶ 2 pumps (duty/standby) fixed or variable speed
- ▶ Low- or high-head models available
- ▶ 2 or 4 poles motors
- ▶ VPF and VPF.D variable primary water flow controls available

VPF control logic

The VPF control series (Variable Primary Flow system) adjusts the pump speed on the basis of the plant's thermal load and ensures both the highest pump energy savings and chiller stable operation.

VPF: constant ΔP on the plant side

For systems with the primary circuit only.

VPF.D: constant ΔT on the plant side

For systems with primary and secondary circuits separated by a hydraulic decoupler.

Compact screw compressors, optimized for high pressure ratio applications

- ▶ 25% minimum capacity step
- ▶ Economizer circuits to increase efficiency and capacity
- ▶ Long-life bearings (more than 150.000h at full load)
- ▶ Star/Delta starting

Smart Defrost

Thanks to the large know-how in heat pump technology, a series of smart proprietary auto adaptive algorithms have been developed to manage in the smartest way the defrosting cycles.

- ▶ Reduction in defrosting time
- ▶ Minimum impact on leaving water temperature
- ▶ Reduction of energy required for defrosting
- ▶ Increase of COP

+10%
NET HEATING
CAPACITY
compared to units with traditional defrost cycles.

W3000TE CONTROL AND USER-FRIENDLY INTERFACE

The logic behind FOCS-N-G05 is the W3000TE control software. Characterized by advanced functions and algorithms, **W3000TE features proprietary settings** ensure faster adaptive responses to different dynamics, in all operating conditions:

- ✓ Efficient and reliable operation in all conditions
- ✓ Connectivity with the most commonly used BMS protocols (Opt.)
- ✓ Demand limit option (available for double circuit units).

Notes:

1 Plant (side) cooling exchanger water (in/out) 12°C/7°C; Source (side) heat exchanger air (in) 35°C.

2 Values in compliance with EN14511

3 Plant (side) heat exchanger water (in/out) 40°C/45°C; Source (side) heat exchanger air (in) 7°C - 87% R.H.

4 Parameter calculated for LOW-TEMPERATURE application in AVERAGE climate conditions according to [REGULATION (EU) N. 813/2013]

5 Average sound pressure level at 1m distance, unit in a free field on a reflective surface; non-binding value calculated from the sound power level.

6 Sound power on the basis of measurements made in compliance with ISO 9614.

7 Sound power level in cooling, outdoors.

8 Sound power level in heating, outdoors.

9 Unit in standard configuration/execution, without optional accessories.

10 Parameter calculated according to [REGULATION (EU) N. 2016/2281]

11 Seasonal energy efficiency ratio

12 Seasonal space cooling energy efficiency

13 Seasonal coefficient of performance

14 Seasonal space heating energy efficiency

15 Energy efficiency class referred to LOW-TEMPERATURE application in AVERAGE climate conditions according to [REGULATION (EU) N. 811/2013]

The units highlighted in this publication contain HFC R513A (XP10) [GWP₁₀₀ 631] fluorinated greenhouse gases.

Certified data in EUROVENT

FURTHER OPTIONS

Auxiliary input

Auxiliary signal 4-20mA: Analog input signal that enables the main setpoint variation according to the value of current applied.
Remote signal double set-point: Analog input signal that allows to change the operating set-point switching only among 2 fixes set-points.
Remote Demand Limit: Voltage free digital input to temporarily limit the units' power consumption.

Electrical

Numbered wiring: Electrical board wires are identified by numbered labels also indicated in the unit's wiring scheme to facilitate maintenance of the electrical board connections.
Compressor rephasing: Capacitors installed on the compressors' powerinlet line to increase the unit's average cos(phi).
Automatic circuit breakers: Over-current switches provided in place of standard fuses to protect the compressor from possible current peaks.
Soft-starter: Electronic device to manage the inrush current of the compressor.

Connectivity

Serial card interface module to allow integration with BMS protocols: Modbus LonWorks / BACnet MS/TP/ BACnet over IP.
M-Net interface kit: Interface module to allow the integration of the unit with Mitsubishi Electric proprietary communication protocol M-Net.

Heat exchanger

Water flow switch: Designed to protect the unit where the water flow across the evaporator is not sufficient and falls outside of the operating parameters.
Flanged hydraulic connections: Grooved coupling with flanged counter-pipe.

HWT kit

HWT kit: High water temperature kit, to enlarge the operating range of the unit. With this option, the maximum condenser leaving water temperature is 60°C.

Structure

Coils protecting grilles: protect the coils against the intrusion of external solid bodies.
Rubber type antivibration mountings: Reduce vibrations, keeping noise to a minimum.

"BY FAR THE BEST PROOF IS EXPERIENCE"

Sir Francis Bacon
British philosopher
(1561 - 1626)

Every project is characterised by different needs and system specifications for various climates. All these projects share high energy efficiency, maximum integration, and total reliability resulting from the Climaveneta brand experience.

HOTEL ABI D'ORU

Marinella Gulf - Italy

Period: 2016 - 2017
Application: Hotel and resorts
Cooling capacity: 680 kW
Heating capacity: 300 kW
Installed machines: 1x TECS XL CA 0452; 1x FOCS-NR XL CA 12022; i-life2; i-life2HP; ClimaPRO

CAMPUS NEW VELIZY

Vélizy - Villacoublay - France

Period: 2016
Application: School / University
Cooling capacity: 935 kW
Heating capacity: 235 kW
Installed machines: FOCS-N/D/ LN-CA 3622

NAVE DE VERO

Marghera - Venice - Italy

Period: 2014
Application: Shopping Centre
Cooling capacity: 3842 kW
Installed machines: 1x FOCS2-W-/ CA-E 4802, 1x NECS/Q/SL 0152, 2x FOCS2-W/D/CA-E 4802, 1x FOCS-N/SL-CA 4822, 2x FOCS-N/D/SL-CA 4822

GUSTAVO FRICKE HOSPITAL

Viña del mar - Chile

Period: 2016 - 2018
Application: Healthcare / Hospitals
Cooling capacity: 6381 kW
Heating capacity: 5711 kW
Installed machines: 1x ERACS2-Q/SL-CA 2722, 2x FOCS-N/B 2622, 4x FOCS-N/B 3222, 2x FOCS-N/B 2222, 1x MANAGER 3000

BNP PARIBAS CARDIF

Nanterre - Paris - France

Period: 2012
Application: Bank Offices
Cooling capacity: 662 kW
Installed machines: 3x i-WZ-D/S 10000, 2x i-WZD/S 15000, 2x FOCS-NR/XL-CA-E/S (1062, 1762), 1x NECS-N/LN 0302

ESSELUNGA VERONA

Verona - Italy

Period: 2017
Application: Supermarket
Cooling capacity: 377 kW
Heating capacity: 300 kW
Installed machines: x FOCS-N/XL-CA-E /S 1722

for a greener tomorrow

Eco Changes is the Mitsubishi Electric Group's environmental statement, and expresses the Group's stance on environmental management. Through a wide range of businesses, we are helping contribute to the realization of a sustainable society.
