

How Lossnay Cuts Energy Costs vs. Traditional Ventilation with Electric Heating

Maximise Energy Savings with Lossnay Heat Recovery Ventilation

Mitsubishi Electric's Lossnay Fresh Air Heat Recovery Ventilation Systems do more than just improve air quality – they help create a healthier, drier, and more comfortable home while reducing energy costs of heating and cooling. Ideal for homes across New Zealand's diverse climates, these systems offer significant energy cost savings when compared to traditional ventilation.

By recovering heat energy from outgoing air, the Lossnay system pre-warms or pre-cools incoming fresh air, reducing the workload on your heating or cooling system. This means less power is required to maintain your desired indoor temperature, leading to noticeable reductions in your energy bills year-round.

Discover Lossnay Energy Cost Savings in Your Region

The following tables are based on real-world operation and highlight the potential savings when choosing Mitsubishi Electric's Lossnay Fresh Air Heat Recovery Ventilation compared to a conventional ventilation system with an electric heating/cooling device (COP of 1), delivering practical benefits for homes throughout New Zealand.

North Island Potential Cost Savings

Compared to Traditional Ventilation with an Electric Heating/Cooling Device

Whole Home Systems for Homes with an Attic

Mitsubishi Electric Whole Home Lossnay Ventilation Systems are available with both energy recovery or heat recovery options to give whole home ventilation suitable for both smaller and larger homes with sufficient attic space.

LGH-35RVX3-E

Lossnay ERV (Energy Recovery Ventilation)

The below power savings are based on comparing a conventional, continuously run ventilation system using an electric heating/cooling device (COP of 1) to a Lossnay LGH-35RVX3-E Energy Recovery System.

Region	1 Year	3 Year	5 Year	Power Savings of up to
Whangārei	\$494	\$1,482	\$2,470	65%
Auckland	\$583	\$1,749	\$2,915	66%
Hamilton	\$870	\$2,610	\$4,350	70%
Tauranga	\$820	\$2,460	\$4,100	70%
Rotorua	\$1,190	\$3,570	\$5,950	72%
Taupō	\$1,386	\$4,158	\$6,930	72%
Gisborne	\$901	\$2,703	\$4,505	70%
Napier	\$934	\$2,802	\$4,670	70%
New Plymouth	\$964	\$2,892	\$4,820	71%
Palmerston North	\$1,057	\$3,171	\$5,285	70%
Whanganui	\$897	\$2,691	\$4,485	69%
Wellington	\$1,148	\$3,444	\$5,740	71%

South Island Potential Cost Savings

Compared to Traditional Ventilation with an Electric Heating/Cooling Device

Whole Home Systems for Homes with an Attic

Mitsubishi Electric Whole Home Lossnay Ventilation Systems are available with both energy recovery or heat recovery options to give whole home ventilation suitable for both smaller and larger homes with sufficient attic space.

LGH-35RVX3-E

Lossnay ERV (Energy Recovery Ventilation)

The below power savings are based on comparing a conventional, continuously run ventilation system using an electric heating/cooling device (COP of 1) to a Lossnay LGH-35RVX3-E Energy Recovery System.

Region	1 Year	3 Year	5 Year	Power Savings of up to
Nelson	\$1,193	\$3,579	\$5,965	72%
Blenheim	\$1,320	\$3,960	\$6,600	72%
Westport	\$1,096	\$3,288	\$5,480	71%
Christchurch	\$1,497	\$4,491	\$7,485	72%
Hokitika	\$1,286	\$ 3,853	\$6,430	71%
Kaikōura	\$1,415	\$4,245	\$7,075	72%
Lake Tekapo	\$2,277	\$6,831	\$11,385	74%
Alexandra	\$1,621	\$4,863	\$8,105	73%
Timaru	\$1,650	\$4,950	\$8,250	72%
Dunedin	\$1,674	\$5,022	\$8,370	72%
Queenstown	\$2,025	\$6,075	\$10,125	73%
Invercargill	\$1,786	\$5,358	\$8,930	73%

North Island Potential Cost Savings

Compared to Traditional Ventilation with an Electric Heating/Cooling Device

Whole Home Systems for Homes with or without an Attic

Vertical Lossnay provides heat recovery ventilation that does not require installation in the roof space.

-  Balanced Pressure System
-  HRV Non-Permeable Core
-  Suitable for wet areas

VL-350CZPVU-E

Lossnay HRV (Heat Recovery Ventilation)

The below power savings are based on comparing a conventional, continuously run ventilation system using an electric heating/cooling device (COP of 1) to a Lossnay VL-350CZPVU-E Heat Recovery System.

Region	1 Year	3 Year	5 Year	Power Savings of up to
Whangārei	\$558	\$1,674	\$2,790	70%
Auckland	\$611	\$1,833	\$3,055	67%
Hamilton	\$858	\$2,574	\$4,290	67%
Tauranga	\$788	\$2,364	\$3,940	66%
Rotorua	\$1,072	\$3,216	\$5,360	64%
Taupō	\$1,178	\$3,534	\$5,890	61%
Gisborne	\$804	\$2,412	\$4,020	61%
Napier	\$797	\$2,391	\$3,985	58%
New Plymouth	\$939	\$2,817	\$4,695	69%
Palmerston North	\$972	\$2,916	\$4,860	64%
Whanganui	\$835	\$2,505	\$4,175	63%
Wellington	\$1,010	\$3,030	\$5,050	62%

How Lossnay Cost Savings are Calculated

Cost savings are calculated based on a comparison between a conventional ventilation system using an electrical heating/cooling device with a COP of 1, using thermistor-controlled operation to achieve desired set temperatures operating continuously (24/7) for 30 days a month versus a Lossnay Heat Recovery System.

The comparison assumes a standard 150m² home with an average ceiling height of 2.4m, maintaining indoor temperatures of 21°C in winter and 20°C in summer, while achieving an air change rate of 0.5 ACH (Air Changes Per Hour).

Actual savings may vary depending on factors such as insulation, occupancy patterns, outdoor climate conditions, and energy tariffs.

Models selected:

- ERV Application: LGH-35RVX3-E
- HRV Application: VL-350CZPVU-E

Old 'Positive' Pressure Forced Roof Cavity Ventilation

These traditional systems push air from the attic into your home, relying on gaps in older buildings for air displacement. However, without heat recovery, they introduce cold air, increasing your heating costs.

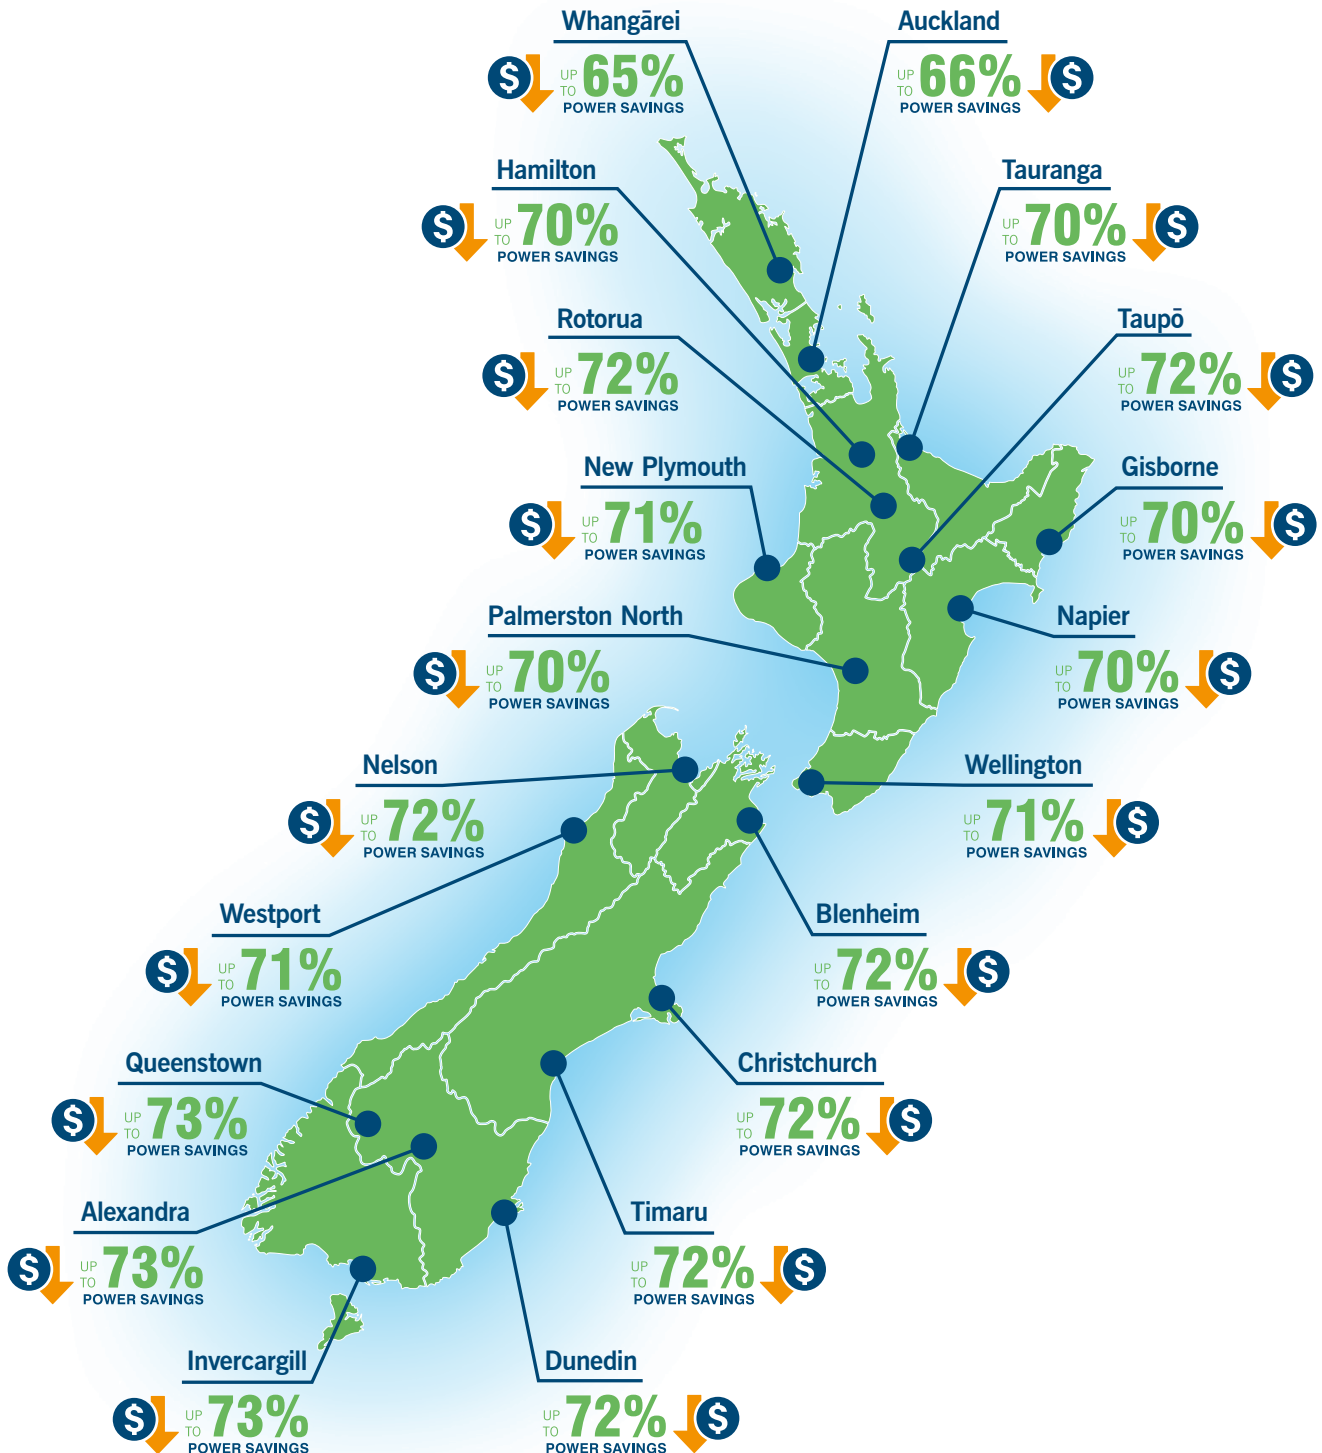

New Lossnay 'Balanced' Pressure Fresh Air Heat Recovery Ventilation

This system replaces stale indoor air with fresh outdoor air at the same rate while **recovering heat energy** to pre-warm incoming air. Designed for modern, airtight homes, it reduces the need for extra heating, keeping energy costs down.

How Lossnay Energy Cost Savings Compare Across New Zealand

• Cost savings are calculated based on a comparison between a conventional ventilation system using an electrical heating/cooling device with a COP of 1 using thermostat-controlled operation to achieve desired set temperatures operating continuously (24/7) for 30 days a month versus a Lossnay LGH-35RVX3-E Heat Recovery System.

• The comparison assumes a standard 150m² home with an average ceiling height of 2.4m, maintaining indoor temperatures of 21°C in winter and 20°C in summer, while achieving an air change rate of 0.5 ACH.

• Actual savings may vary depending on factors such as insulation, occupancy patterns, outdoor climate conditions, and energy tariffs.

Black Diamond Technologies and Mitsubishi Electric – an Exclusive Partnership Since 1981

The Mitsubishi Electric Product Range has been exclusively distributed by 100% locally owned and operated Black Diamond Technologies Limited for over 40 years in New Zealand.

The combination of an internationally trusted brand with the comfort of a locally owned and operated company means that you will always get the best products, the best local service and the best local support.

Based in Wellington with a further 4 support offices throughout New Zealand, Black Diamond Technologies Limited is here to help.

Our Vision – Creating New Zealand’s Sustainable Future

Black Diamond Technologies Limited in partnership with Mitsubishi Electric, strives to develop and introduce new technologies for New Zealanders that will make our lives more comfortable while also creating a greener tomorrow.

Our Nationwide Trained Specialist Installation Network

Mitsubishi Electric Ventilation products are installed through an extensive network of trained specialist dealers. This ensures you are supported with a superior level of product and installation quality.

Our Comprehensive 5 Year Warranty

Peace of mind is assured with your choice of Mitsubishi Electric Lossnay Energy Recovery Ventilation – supported by a comprehensive 5 year parts and labour warranty.
